Research Team

Consultant: Dr. Nasiruddin Ahmed, Professor BIGD, BRAC University and former Chairman, National Board of Revenue

Research Associate: Shima Das Shimu, Director, UBINIG

Data entry: Golam Rabbi Badal and Samrat Hossain

Field Investigators: Tabinaj members in 8 divisions

& UBINIG Team (Sayyida Akhter, Rasheduzzaman and Hasanul Galib)

Acknowledgement

UBINIG acknowledges the cooperation of the NBR VAT Members, Commissioners of VAT Commissionerates and Tabinaj members for their contribution to the study. UBINIG also acknowledges the suggestions and comments given by Md. Ataur Rahman from the stage of Questionnaire development, data analysis to report writing.

UBINIG is grateful to Campaign for Tobacco-Free Kids (CTFK) for supporting the study.

Farida Akhter
Executive Director

Executive Summary

- a. **This study:** Smokeless tobacco (SLT) use in Bangladesh is high, yet it is generally held that SLT manufacturing often occurs outside the tax net. This study examines SLT production, pricing and turnover for a sample of 88 SLT manufacturers operating outside the tax net and identifies factors perceived to contribute to non-payment of taxes by SLT manufacturers.
- b. **Study methodology:** The study incorporated a desk review of research literature on SLT manufacturing in Bangladesh and both quantitative and qualitative data collection methods; specifically, the NBR data on SLT manufacturers and their tax payment history, a survey of 88 SLT manufacturers operating outside the tax net, 15 key informant interviews (KIIs) and a group discussion with experts on SLT taxation.
- c. **SLT manufacturers' list:** The desk review of prior studies on SLT manufacturing produced a list of the 435 Zarda and Gul manufacturers in Bangladesh. The NBR provided data on 218 SLT manufacturers with a consistent record of VAT payment during the five-year period from FY 2015-16 to FY 2019-20.
- d. **SLT taxation:** SLT taxation is governed by the Value Added Tax and Supplementary Duty Act, 2012. The government introduced maximum retail price (MRP) as the tax base for SLT products replacing tariff value in FY 2019-2020. The tax structure of SLT products is characterized by low tax base and ad valorem tax system.
- e. **Low SLT revenue share in total tobacco tax revenue:** The total revenue collected from the 218 SLT manufacturers who paid all taxes due from FY 2015-16 to FY 2019-20 is Tk. 165.75 crore. As a percentage of total tobacco tax revenue, SLT revenue is very low, from 0.11% to 0.17% from FY 2015-16 to FY 2019-20.
- f. **Trade license:** Of the 88 SLT manufacturers surveyed, 67% have valid trade licenses.
- g. **Mechanization:** 91% of manufacturers rely on manual production of SLT products.
- h. **SLT brands:** Among 81 Zarda manufacturers surveyed, 63% operate businesses producing one brand, while 37% produce 2 or more brands. The 7 Gul manufacturers produce only one brand each.
- i. **Weight variation of SLT brands:** The SLT brands are produced in different weights. In general, SLT brands are sold at lower weights, more than a quarter are in the range of less than 10 g., and half of the SLT brands are in the range of 10 g. to 25 g.
- j. **Price variation:** Zarda price is less than Tk. 10 in 37% brands/weights and less than Tk. 20 in 23% brands/weights. Gul price is less than Tk. 10 in 90% brands/weights and less than Tk. 20 in 10% brands/weights. The minimum price of Zarda is Tk. 3.5 for 3g and the maximum price is Tk. 1000 for 1000g at the factory level. The price for most common weight 10 g is Tk.5.
- k. **Gross turnover:** The 88 SLT manufacturers included in the survey produce 138 SLT brands and 37 crore SLT packages, yielding an estimated gross annual turnover of Tk. 226.70 crore for 2020.

l. Implications for tax policy: Many factors contribute to the deficiencies documented in tax compliance: a lack of a comprehensive tax policy that adequately addresses concerns about public health and illicit trade; capacity constraint of the NBR field offices; gaps in the tax implementation that serve to minimize enforcement; complexities with licensing and submitting tax returns; and most importantly, loopholes that allow for the informality of the SLT sector and result in low revenue collection from the SLT manufacturers. Policy remedies are needed to address these issues.

m. Recommendations:

- Restructure the SLT tax structure to protect public health and improve revenue collection.
- Support capacity building of the NBR by restructuring its field formations with resources.
- Formalize the SLT manufacturing business through inclusion in financial systems (e.g., banking).
- Introduce banderole for monitoring.
- Bring automation to the tax return processing system.
- Authorize local government institutions to bring SLT manufacturers under local tax nets.
- Introduce a secure tracking and tracing system.
- End the practice of recognizing tobacco manufacturers with awards.

1. Introduction

Smokeless tobacco (SLT) products are found across the globe, and they are broadly categorized as “spit tobacco” or “chewing tobacco”. Globally, an estimated 300 million people across about 70 low-, middle-, and high-income countries use SLT. Most adult smokeless tobacco users (89%, or approximately 268 million people) live in low- and middle-income countries (LMICs) in South-East Asia. Three countries alone (India, Bangladesh and Myanmar) host 86% of the global total SLT use [U.S. National Cancer Institute and Centers for Disease Prevention, 2014].

In Bangladesh, more than 22 million adults (20.6% of adults) use SLT products. According to the 2017 Global Adult Tobacco Survey, use of SLT products is higher among women (24.8%) than among men (16.2%) [GATS, 2017]. Among youth (ages 13–15), 4.5% use SLT products [GYTS, 2013]. SLT use causes cancer of the oral cavity, esophagus, and pancreas and reproductive and developmental harms for unborn babies, including stillbirth, preterm birth, and low birth weight [WHO, 2013].

Considering its harmful effects on health of the users, SLT products are included in the Smoking and Tobacco Products Usage (Control) Act, 2005, amended in 2013 [MOHFW, GOB, 2013]. Among SLT products, Zarda and Gul need processing with tobacco leaves and other ingredients in production units or in factory conditions. Sadapata (tobacco leaf) is sold and processed as an agricultural product and is not manufactured. However, the information on the number of manufacturing units and their production is not available in an organized way. Regulatory mechanisms, such as licensing and trading standards, either do not exist or are inadequately enforced to regulate the composition and sales of such products. Evidence shows that SLT product manufacturers have little tax compliance (Khan *et al* 2014).

The price of SLT products is very low, making it affordable to the users [WHO, 2019]. The WHO Framework Convention on Tobacco Control (FCTC) Article 6 recognizes that price and tax measures are highly effective in reducing tobacco consumption across various segments of the population [WHO, FCTC].

Few field-based studies are available on the SLT production in Bangladesh, and our desk research found none on the compliance of the manufacturers for tax and other regulations. In 2014 and 2020, UBINIG (Policy Research for Development Alternative) collected information on the brands and on the production of Zarda and Gul. Dhaka International University (DIU) assessed Zarda and Gul manufacturers between 2016 and 2019.

1.1 Taxation of SLT Products

SLT taxation is governed by the Value Added Tax and Supplementary Duty Act, 2012. The tax structure of SLT products is characterized by low tax base and *ad valorem* tax system. SLT products were historically not taxed because they were treated as cottage industries before 2003. In June 2003, the government took SLT products out of the purview of cottage industries, and they were taxed for the first time in FY 2003-04. The manufacturers of SLT products had to declare ex-factory price subject to revision by the VAT authority. In FY 2016-17, the government fixed the price of SLT products (tariff value) replacing the ex-factory price. In FY 2019-2020, the government introduced maximum retail price (MRP) as the tax base for SLT products replacing tariff value. The tax structure of SLT products for FY 2019-20 and FY 2020-21 is presented in Table 1. It shows an increase of MRP of both Zarda and Gul over the period.

Table 1: Tax structure of SLT products in Bangladesh (FY 2019-20 and FY 2020-21)

SLT products/ 10 gram	Tax base	FY 2019-20					FY 2020-21				
		Price (BDT)	VAT (%)	SD (%)	HDS (%)	TTI (%)	Price (BDT)	VAT (%)	SD (%)	HDS (%)	TTI (%)
Zarda	MRP	30	15	50	1	66	40	15	55	1	71
Gul	MRP	15	15	50	1	66	20	15	55	1	71

Source: National Board of Revenue (NBR), 2020

Notes: MRP is inclusive of all taxes. SD stands for supplementary duty, HDS stands for Health Development Surcharge, and TTI stands for the total tax incidence.

1.2 Objectives of the study

General objective: To understand SLT production and identify barriers and factors that may impact tax payment for SLT manufacturers operating outside the tax net in Bangladesh.

Specific objectives:

1. Develop a list of SLT manufacturers' available from the existing studies.
2. Identify the SLT manufacturers with revenue, which are under the NBR tax net.
3. Provide the NBR with evidence of SLT manufacturers operating outside the tax net.

2. Methodology

This study began with desk research and then employed both quantitative and qualitative research methods to meet study objectives.

2.1 Desk review

The desk review examined government information and research literature on SLT taxation, production, and manufacturers.

2.2 Quantitative data collection: NRB data and survey of manufacturers

Quantitative data were collected in two stages. In the first stage, data were collected from the NBR field level offices and in the second stage; a SLT factory survey was conducted.

Data collection from NBR field level offices

With the consultation of NBR Customs, Excise and VAT Commissionerates, a checklist was developed and sent to relevant officials based at 10 NBR field level offices in 8 divisions in September, 2020. Information was collected on SLT manufacturers, tax payment status, five-year history of revenue collection from individual SLT manufacturers, and other information.

Survey of SLT manufacturers

A cross sectional survey was conducted among SLT (Zarda and Gul) manufacturers.

Study subject: SLT manufacturers in Bangladesh outside the tax net.

Sample size and sampling method: A list of SLT manufacturers in Bangladesh was compiled based on UBINIG 2014 and 2020, and DIU 2020 studies. A list of tax paying SLT manufacturers was collected from the NBR VAT Commissionerates. A comprehensive list of SLT manufacturers was developed that identified the SLT manufacturers who are paying taxes and who are not paying. A division-wise list of non-tax paying SLT manufacturers was developed.

A total of 88 non-tax paying SLT manufacturers were selected purposively from eight administrative divisions and were checked about their tax compliance (Annex 1).

Source: UBINIG study, 2020

The sample was drawn from 53 upazilas in 29 districts of 8 divisions [see Map in Figure 1].

Figure 1: Map locating the sample of 88 SLT factories in 53 upazilas of 29 districts

Questionnaire

A semi-structured questionnaire was developed in consultation with the NBR high officials, experts and researchers. Pre-test was conducted by the trained research assistants and recommendations/feedbacks were incorporated and finalized the questionnaire. The final questionnaire consisted of several sections/topics including regulation status of SLT manufacturers, production and turnover, workers' compliance, factory size, etc.

Recruitment, training and field work

TABINAJ (TamakBirodhiNariJote) is a network of women-led organizations working for tobacco control in all districts of Bangladesh since 2011. Sixteen trained data collectors from TABINAJ members were recruited for conducting the field survey from eight divisions [Annex 2]. The investigators had the required graduate degree as minimum educational background.

A day-long training session was conducted virtually on 10 September, 2020. Experts from UBINIG and CTFK conducted training programs, which covered methodology of the research, selection of sample SLT manufacturers, administration of questions and method of data collection. Mock interviews were done in the final session of the training.

The questionnaire was piloted from 11 September to 14 September, 2020 with eight SLT manufacturers. A refresher training session was conducted on 15 September 2020, which covered the questionnaires and resolving data collectors' queries.

Field Work

Field work for data collection was carried out from mid-September to November, 2020. Owing to the COVID-19 pandemic, data collectors encountered transportation problems. Personal protective measures such as use of masks, hand sanitizers and maintaining safe distances, were taken by the data collectors. The addresses of SLT manufacturers' factories were not always accurate, so data collectors often visited several times and expended a lot of time trying to locate the factories. Two supervisors in UBINIG continuously monitored the data collection team and provided real time support to overcome the challenges and respond to all queries. Data were collected from 56 owners and 32 managers of the SLT factories.

Data Management

All original filled in questionnaires were posted to UBINIG Dhaka office and were checked by the supervisors. Editing, coding and consistency were checked and entered in an excel spreadsheet and data analysis was performed.

2.3 Qualitative methods: Key informant interviews

Key informant interviews (KIIs) and a group discussion (GD) were conducted with the experts on taxation. A pre-tested checklist was used for the KIIs. KIIs were conducted with a total of 13 high-level officials of the head office and 11 VAT Commissionerates of the NBR, one tax lawyer (a former Member of the NBR), and a Member of the Parliament. [Annex 3]. The group discussion (GD) was conducted among eight NBR field officials.

All but two KIIs were conducted virtually due to COVID-19 pandemic situation. All interviews were recorded. Responses from the participants were coded, compiled, and analyzed.

Table 3: Experts in Key Informant Interviews (KII)

Sl. No	Categories	Number
1.	VAT Commissionerates of NBR & Officials at NBR HQ	13
2	Tax lawyer (Former Member (VAT), NBR	1
3	Member of Parliament (MP)	1
	Total	15

3. Findings

3.1 Desk review

Two research studies conducted by UBINIG and DIU were reviewed.

- i. UBINIG and Tabinaj identified 241 manufacturers of Zarda and 7 Gul through a countrywide survey (UBINIG, 2020).
- ii. The Dhaka International University (DIU) survey from 2016 to 2019 identified 358 Zarda and 37 gul manufacturers producing 788 brands of Zarda and Gul.

The combined number of Zarda and Gul manufacturers was prepared taking out the duplicate names from both list and the new names in UBINIG/DIU and the common names were added to have a final combined list of 435 Zarda and 48 gul manufacturers in UBINIG and DIU list [Annex 4].

Table 4: Number of Zarda and Gul manufacturers in UBINIG and DIU list

Information source	# of Zarda Manufacturers	# of Gul Manufacturers
UBINIG study 2014 and 2020	241	7
DIU study, 2019	358	37
Common in UBINIG & DIU	164	4
Combined List UBINIG and DIU	435	48

Source: UBINIG and DIU, 2020

3.2 NBR data on tax compliance of SLT products

Data provided by the NBR field offices show that 218 SLT manufacturers paid taxes in 8 divisions. Among the 8 divisions, Rangpur division has the highest number of SLT manufacturers that pay taxes (39%) followed by Dhaka division (22%) [Annex5].

Table 5: Payment of taxes of SLT manufacturers in 8 divisions

Sl. No	Division	District	VAT paying Zarda manufacturers	VAT paying Gul manufacturers	Total Manufacturers that Pay VAT	
					N	%

Total	8	32	159	59	218	100

Source: NBR data, 2020

The Gul manufacturers are located in four divisions, out of which Rangpur division shows the highest number (69%) among the 59 tax paying Gul manufacturers. These manufacturers have been paying VAT from FY 2015-16 to FY 2019-20. The list provided by the NBR field offices includes information on the manufacturers' name, address, brand name, registration number (BIN number), and tax payments from FY2015-16 to FY2019-20.

Among the 218 SLT manufacturers, an overwhelming majority of manufacturers have provided all identifiable information. Less than 10% did not provide address, brand name, BIN number etc. About half (51%) have paid taxes each of the last five years (FY 2015-16 to FY 2019-20) and the other half (49%) of the manufacturers had gaps in paying taxes during the five-year period.

Table 6: Tax payments by SLT manufacturers for five years (FY 2015-16 to FY 2019-20)

Categories	Frequency	Total NBR listed manufacturers	Percentage
Compliance of all SLT manufacturers	111	218	51
Compliance of Zarda manufacturers for 5 years	94	159	59
Compliance of Gul manufacturers for 5 years	17	59	28

The percentage of SLT manufacturers that did not pay taxes declined from FY 2015-16 to FY 2018-19, as shown in Table 7 below.

Table 7: SLT Manufacturers that did not pay taxes during FY 2015-16 to FY 2019-20.

Fiscal year	# of non-tax paying manufacturers	Percent of 218 manufacturers
2015 – 16	91	41
2016 – 17	70	32
2017 – 18	37	16
2018 – 19	12	5
2019 – 20	26	12

Source: Customs, Excise and VAT Commissionerates of NBR, 2020

The NBR collected Tk. 165.75 crore as SLT revenue from FY 2015-16 to FY 2019-20. SLT revenue collection is the highest in the VAT Commissionerates of Dhaka. (Table 8)

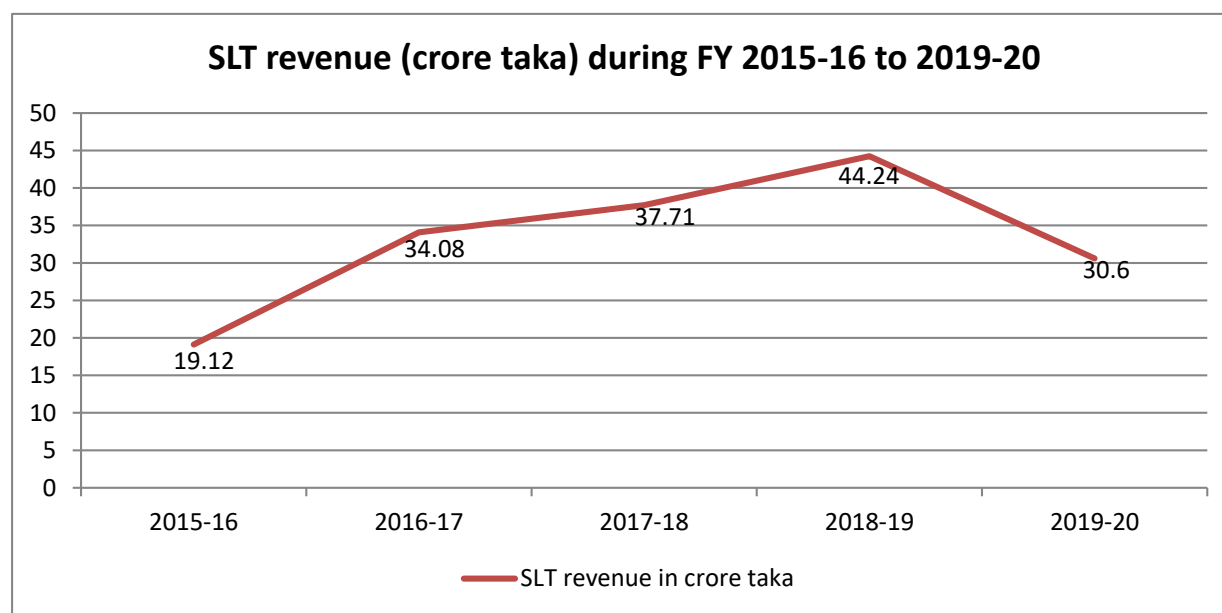

Table 8: Revenue (crore Taka) from SLT products by NBR by VAT Commissionerate, FY 2015-16 to FY 2019-20

Commissionerate	2015-16	2016-17	2017-18	2018-19	2019-20
Dhaka (North)	2.15	5.62	6.50	7.06	5.81

Jashore	1.50	2.41	3.21	5.56	3.71
Overall	19.12	34.08	37.71	44.24	30.60

Source: Customs, Excise and VAT Commissionerates of NBR, 2020

Total SLT revenue collection increased annually from FY 2015-16 to FY 2018-19 but declined in FY 2019-20. The reduction of revenue in FY 2019-20 may be attributed to the outbreak of Covid-19 pandemic (Figure 2).

Figure 2: Total revenue collection from SLT products during FY 2015-16 to 2019-20

Source: Based on NBR dataSource: NBR data, 2020

Revenue collection from the taxation of all tobacco products (smoked and SLT) ranged from 16713.86 crore Taka to 26388.10 crore Taka over the five-year period examined in this study. When compared to the total revenue collected, the tax revenue from SLT is very minimal, ranging from 0.11% to 0.17% of total tobacco revenue (Table 9).

Table 9: SLT revenue as a percentage of tobacco revenue in Bangladesh during 2015-16 to 2019-20

FY	SLT revenue (crore Taka)	Tobacco revenue (crore Taka)	SLT revenue % of total tobacco revenue

2016-17	34.08	20013.94	0.17
2017-18	37.71	22866.91	0.16
2018-19	44.24	28551.55	0.15
2019-20	30.60	26388.10	0.12

Source: NBR, 2020

3.3 Findings of the SLT manufacturers' survey

A sample of 88 SLT manufacturers (81 Zarda and 7 Gul) were interviewed in 8 divisions of the country as shown in Table 2. The primary focus of the field survey was to collect information about the context and nature of SLT manufacturing that could have bearing on tax payments. .

3.3.2 Factory Information

Trade license

Fifty-nine (67%) SLT manufacturers have valid trade licenses. Out of them, 21 (40%) got the license from City Corporation, 29 (49%) from Paurashava and 7 (12%) from the Union Parishad and 2 (3%) from Upazila Parishad.

Twenty-nine (33%) manufacturers did not have valid trade licenses. The primary reasons given for not renewing the licenses were the non-availability of raw materials and the imminent closure of the factory.

Table 10: Trade license status of sample SLT manufacturers

Trade License	# of manufacturers	Percent
Valid trade license	59	67
No valid trade license	29	33
Total	88	100

Source: UBINIG study, 2020

Factory signboard

Only two SLT factories had signboards; one was fixed outside and the other was inside the factory.

Factory size

Seventy-four of the 88 manufacturers provided information on the factory size.

- Most manufacturers (61%) have less than 500 sq.ft. space used as factory.
- Manufacturers with smaller space (i.e., below 500 sq. ft.) use the owners' houses as the factory. The average size of the space used in the owner's house is 126 sq.ft.
- About 31% of the factories are between 500 to 2000 sq. ft. areas. The average size is 1224 sq. ft.
- The smallest size factory is 80 sq. ft. and largest size is 22,000 sq. ft. The average size of the factory settings for the 74 manufacturers providing information is 684sq.ft.
- Two factories have an average of 21,000 sq.ft. One of these manufacturers is registered as a Zarda factory and the other as a chemical manufacturer.

Table 11: size of the SLT factories

Size of the factory (sq.ft)	# of factories	% of factories	Average size (sq. ft)	Factory type
<500 sq. ft	45	61	126	Owners' house
500–2000	23	31	1224	Factory
2001 – 8000	4	5	3628	Factory
20000 +	2	3	21000	Factory
Total	74	100		

Source: UBINIG study, 2020

Land

Seventy-two percent of the SLT manufacturers owned the land used for production of SLT products and 27% rented land on monthly payment basis.

Use of machines

Eighty-one of the 88 manufacturers reported the production method. with machines or by manual operations. Seventy-four factories (91%) produce SLT products manually.

Table 12: Production method in SLT factories

Production method	# of factories	Percent
Manual	74	91
Semi-automatic machine	3	4
Semi and automatic machine	4	5
Total	81	100

Source: UBINIG study, 2020

The factory information indicates the informality of the SLT manufacturers in terms of the factory set up and their visibility, with nearly two-thirds being set up as part of the residence of the owners.

3.3.3 SLT products: Zarda and Gul

Type of SLT products

There are 81 Zarda and 7 Gul manufacturers. Among 81 Zarda manufacturers, 63% have 1 brand, while 37% have 2 or more brands (Table 13). All Gul manufacturers produce only 1 brand. None of the manufacturing units in the sample are producing both Zarda and Gul. Gul manufacturers are found in four divisions (Dhaka, Khulna, Rajshahi and Rangpur) with a large number of factories located in Rangpur division.

Table 13: Number of Zarda manufacturers by brand production

Type of SLT	Zarda Manufacturers	Percent
Single brand	51	63
Two and/or more brands	30	37

Brands of SLT products and quantity produced

The 88 SLT manufacturers produce a total of 138 brands. The average number of brands produced by Zarda manufacturers is 1.6, and the highest number is 5. The total number of brands produced by the 81 Zarda manufacturers is 131. All Gul manufacturers produce only one brand. (Table 14)

Table 14: Number of brands of Zarda and Gul

Brands	Zarda (81)	Gul (7)	Total
Total number of brands	131	7	138
Average # brands/factory	1.6	1	1.67
Minimum # of brands	1	1	
Maximum # of brands	5	1

Weight of SLT

A total of 131 Zarda brands are produced and sold at different weights, resulting in 271 branded Zarda products. About half of the brands available (51%) are packaged at a weight between 10g and 25g and about a quarter (26%) at a weight of less than 10g. The maximum weight of a Zarda brand is 1000g, and the minimum weight is 3g. There are 21 weight levels for Zarda brands [Annex 7].

For Gul brands, 70% are in the weight range of less than 10 g, and 30% are between 10g to 25g. There are 6 weights for Gul with the highest weight for a brand produced at 20g. (Table15).

Table 15: Weight variations by type of SLT product

Weight (in grams)	Zarda brands	Percent	Gul brands	Percent	Total	Percent
<10	71	26	7	70	78	28
10 – 25	137	51	3	30	140	50
26 – 50	39	14	0	0	39	14

Manufacturer Price of SLT

47% of Zarda brand manufacturer prices are Taka 11 to Taka 20. The minimum price of a Zarda brand is Tk. 3.5 for 3g and the maximum price is Tk. 1000 for 1000g at the manufacturer level. The price for most common weight (10g) is Tk.5. Regarding Gul, 90% of brands are sold at a manufacturer price of Tk. 10 or less (Table 16).

Table 16: Price variations among the SLT brands

Price (Taka)	Zarda	percent	Gul	Percent	Total
<10	47	17	9	90	56

SLT turnover (gross sale) per month

At the factory level, about 9.4 lakh Zarda packages are sold per month at Tk.2.7 crore per month for the 88 sample manufacturers. As Table 17 shows, 42% of manufacturers sell less than 2000 packages, 37% sell between 2000 to 5000 packages and 14% sell over 5000 packages.

In case of Gul, 60% manufacturers sell less than 2000 packages. One factory sells 50,000 packages of Gul per month.

Table 17: Number of packages sold per month by SLT manufacturers

# packages sold	Zarda	Zarda %	Gul	Gul %
<2000	111	42	6	60
2001 – 5000	103	37	1	10
5001 - 10000	38	14	1	10

Total	271	100	10	100

Source: UBINIG study, 2020

The total monthly gross turnover is estimated at Tk.2.7 crore from the 138 brands produced by the 88 manufacturers operating outside the tax net. However, the monthly turnover is below Tk. 50,000 for half of the brands sold, and for the other half, Tk. 50,000 and more.

The average monthly turnover is Tk. 99,791, maximum amount being Tk. 30 lakh and the minimum is Tk. 60 per month. The annual business income generated by sales at the point of manufacture is estimated to be Tk. 32.45 crore, with an average of Tk. 12 lakh and maximum of Tk. 36 lakh.

3.4 Summarized opinions from KIIs

KIIs with experts on tobacco taxation identified weaknesses of the SLT taxation system and management of revenue collection from SLT products. The following are the summary of the opinions given by the experts:

a. Informality of SLT manufacturing

In most cases, SLT products are produced in numerous tiny sized manufacturing units, which are found across the different parts of the country and which do not conform to the category of small and cottage industry. This informality poses a serious challenge to enhancing tax compliance of SLT manufacturers.

b. Capacity constraints of the NBR

The NBR and its field formations are structured by type of taxes and territorial jurisdictions. This organizational structure hinders efforts to monitor tax compliance of SLT manufacturers. Moreover, the capacity of the NBR to administer tax on SLT products is low due to the shortage of trained personnel and modern equipment. For the government, resource allocation for such capacity-building is limited and capacity-building has not been prioritized. Another challenge is that the government tends to allocate resources on those sectors from which more taxes can be collected.

c. Complex procedures of licensing, registration, and tax return submission

The complex and cumbersome mechanism required for small scale SLT manufacturers to use prior to submitting their tax returns is a disincentive for tax compliance. As a result, most of the SLT manufacturers tend to evade taxes. The absence of a fully digitalized and automated tax return processing system results in the prevailing tax evasion and the non-tax paying culture of SLT manufacturing businesses.

d. No track and tracing system

Bangladesh lacks a secure track and trace system to detect the SLT manufacturers outside of the tax net. Moreover, except for registration, other processes are manual.

e. Failures in the law implementation process

Failures in the law implementation – specifically enforcement – process are also liable for the reluctance of the SLT manufacturers in complying with the tax law. For tax compliance, non-compliant SLT manufacturers need to follow a procedure which includes obtaining a trade license for running the business, complying with the labor law, and disclosing a bank statement, among other requirements. As this procedure discloses the real income of manufacturers, they will often seek opportunities to avoid compliance to protect their shoddy businesses. Since the amendment of the tobacco control law in 2013, no SLT manufacturer has been tried for violating the law. It points at a vacuum in our legal system.

f. Emphasizing on revenue targets over tax administration and enforcement

As the field-level tax officers are usually driven by the urge to meet their revenue target, they target cigarettes rather than the SLT products since more taxes can be collected from the former than the latter. Therefore, the negative impacts of low-tax products like Zarda and Gul are often not considered. Moreover, strengthening implementation of applicable regulations becomes difficult when the NBR or other government authorities face strong opposition in the form of lobbying by tobacco companies.

g. Conflicting stance of the tobacco control goal of the government

The government has periodically recognized SLT manufacturers with awards. Such recognitions send a signal which is inconsistent with the government's policy of prioritizing public health and seeking to control tobacco use. It is an unnecessary compromise of the public interest that is not expected from policymakers.

h. Absence of a clear comprehensive national policy for tobacco taxation

At present there is no comprehensive tax policy for tobacco products such as cigarette, biri and SLT products such as Zarda, Sadapata, and Gul. Every year before the budget session in the National Parliament, a battle is waged between those advocating for higher taxes on all tobacco products in order to promote public health through reduced use and tobacco companies who seek to keep taxes low claiming it will prevent rampant illicit trade in tobacco products. In the absence of a comprehensive national tobacco tax policy, the revenue collection issue appears to overtake the public health argument every time.

4. Discussion and analysis

The study aims to explore SLT production and characteristics of SLT manufacturers outside the tax net in Bangladesh. Little information is available on the production of the SLT products because of the informality and heterogeneity of the SLT products and the ambiguous nature of manufacturing units. Our results suggest that this remains true. Many SLT manufacturers are small factories or homes and often unlicensed operations, with a few exceptions. Noting that one factory was registered as a chemical factory, it is possible that factories may produce products other than SLT. The informality of SLT factories is also observed by appearance, with the exception of two of the factories, of having no sign boards. It was difficult for investigators to locate the factories only by the address given on the packages of Zarda and Gul, and accurate information about how to locate the factories was obtained from local rickshaw pullers and retail shop keepers. There is significant variation in the income the manufacturers produce, some SLT factories generate substantial income, while others operate at essentially a household subsistence level.

Regarding SLT products, there is much greater variation in Zarda than Gul. There were significantly more Zarda manufacturers, brands, weights, and prices compared to Gul which is produced in fewer areas and is almost always sold at a factory price of Tk. 10 or less. It is noted that over the last five years, revenue from Gul products is consistently and significantly greater than revenue from Zarda.

Our study also suggests that the NBR does not prioritize SLT revenue collection (compared to revenue from cigarettes) and does not have the resources and capacity to improve its tax administration. This may partially explain why revenue from SLT is negligible compared to revenue from other tobacco products, despite more adults using SLT than smoked tobacco products (GATS, 2017). Our findings suggest that in prioritizing the revenue collection goals of the government, both public health and SLT tax compliance are ill-served. It is clear that the government has failed to receive funds due, including the Health Development Surcharge, which is intended to facilitate improvement in population health through the reduction of chronic diseases, including many caused by tobacco use.

However, it is possible to increase revenue from SLT manufacturers by bringing them under tax and regulatory compliance. Bringing SLT manufacturers under the tax net would result in price increase to consumers and thereby spur a reduction in use. Better tax administration, including collection of tax payments owed, is necessary considering the high rates of SLT use, particularly among women, and the detrimental effects of SLT use.

5. Recommendations

i. Reform the SLT tax structure to protect public health and increase revenue.

The existing tax structure of SLT products results in highly affordable SLT products and provides ample opportunity for SLT manufacturers to avoid paying sufficient taxes on a highly addictive and deadly product. The current tax structure should be strengthened to increase tax base, narrow the price gap between Zarda and Gul, and introduce specific tax system for attaining the dual objective of protecting public health and increasing revenue.

ii. Bring automation to the tax return processing system.

Only business registration is automated. Other tax processes must be automated. Having the entire tax return submission process operate under an automated system will enable the government to identify fraudulent tax returns and improve tax compliance.

iii. Invest in capacity-building and restructuring of NBR field formations.

Improving tax compliance of SLT manufacturers depends strongly on the restructuring of the NBR and its field formations by function and size. Moreover, the government should invest in building the capacity of the NBR by providing the resources for training personnel and technology so that the unregulated SLT manufacturers can be identified and brought under the tax net.

iv. Formalize SLT manufacturing business through financial inclusion.

The transactions of SLT manufacturing businesses should be formalized through financial inclusion in banking and other financial channels. Financial inclusion provides a monitoring mechanism for a regulatory body and makes it more difficult for non-compliant SLT manufacturers to evade paying taxes.

v. Introduce banderole for monitoring.

Banderole for the SLT products can be introduced as a measure to improve tax compliance. Moreover, the SLT manufacturers should be asked to submit the relevant papers on proper accounts of the raw materials purchased and products manufactured and sold, to the VAT Commissionerates for monitoring. Additionally, sudden invigilation in the manufacturing plants and markets should also be increased.

vi. Authorize local government institutions to bring SLT manufacturers under local tax nets.

Currently, local government institutions like Union Parishad, Upazila Parishad, Paurashava and City Corporation are involved in issuing licenses to SLT manufacturers. Local governments should also be authorized to bring SLT manufacturers under the tax net. Authorization could be extended to wholesalers and retailers involved in the SLT trade through a licensing fee system.

vii. Introduce a secure tracking and tracing system.

The government should introduce a secure, digital stamp track and tracing system independent from tobacco industry influence for monitoring the movement of SLT products through the chain of distribution. A secure track and trace system independent of tobacco industry influence can support improvements in tax compliance by identifying and removing illicit products from the supply chain.

viii. End the practice of recognizing tobacco manufacturers with awards.

Keeping in mind the importance of public health in national interests, the government should end the practice of giving awards to the highest and longest paying tobacco manufacturers, including SLT manufacturers. SLT is an addictive and deadly product that causes cancer and reproductive and developmental health harms in unborn babies, including stillbirth, preterm birth, and low birth weight.

6. Policy Matrix

SI #	Specific recommendations	Modality of implementation		Time dimension
		By whom	How	
1.	Raising the tax base of SLT products, narrowing down the price differential between Zarda and Gul, and introducing specific tax	NBR	By incorporating in the Finance Act, 2021	June 2021
2.	Bringing tax return processing system under automation	NBR	With the help of VAT Online Project	December 2021
3.	Capacity building of the NBR	IRD, Ministry of Finance	Restructuring the NBR by function and type, providing trained manpower, technology and financial resources	June 2022
4.	Formalizing the SLT manufacturing business through financial inclusion	Ministry of Finance	By issuing Gazette Notification	June 2021
5.	Introducing banderole for monitoring	NBR	Incorporating in the Finance Act, 2021	June 2021
6.	Authorizing local government institutions for bringing SLT manufacturers under tax net	Ministry of Finance	By issuing Gazette Notification	June 2021
7.	Introducing track and tracing system of monitoring	Ministry of Finance and NBR	Allocating funds for introducing the system	December 2022
8.	No award for tobacco manufacturers	NBR	Administrative decision	June 2021
